PROFESSIONAL PROFILE

Dedicated Public Health Emergency Management (PHEM) Officer and Public Health Officer with over 7 years of progressive experience in disease surveillance, epidemiology, outbreak investigation, public health emergency preparedness and response, health information management, and emergency risk management. Experienced in coordinating catchment-level PHEM activities across Woreda 4 and Woreda 6 in Lemi Kura Sub-City, including active case searches, case investigation, surveillance monitoring, rapid response activities, risk assessment, and emergency preparedness.

Familiar with and experienced in the major PHEM pillars and emergency management cycle, including early warning and surveillance, preparedness, response, and recovery. Skilled in surveillance monitoring, event detection and verification, outbreak investigation, rapid response team activities, emergency preparedness planning, risk assessment, response coordination, response monitoring, and recovery-related public health activities.

Proficient in DHIS2, SPSS, and Microsoft Excel for epidemiological data management, analysis, interpretation, visualization, and evidence-based public health decision-making. Skilled in multidisciplinary coordination, health-worker training and mentorship, data quality improvement, public health emergency reporting, and implementation of public health interventions. Holds a Master of General Public Health (MGPH) from Adama Hospital Medical College

Public Health Emergency Management (PHEM) Officer

Arabsa Health Center, Addis Ababa Health Bureau, Lemi Kura Sub-City,
Woreda 4 and Woreda 6

May 2024–Present

Coordinate and support Public Health Emergency Management (PHEM) activities within the health-center catchment areas of Woreda 4 and Woreda 6, covering the major PHEM functions of early warning and surveillance, preparedness, response, and recovery. Conduct and support active case searches, event detection and verification, case investigations, surveillance monitoring, and timely reporting of priority, reportable, epidemic-prone, and other public health conditions. Monitor surveillance and early warning information to identify unusual disease trends, emerging public health threats, and events requiring further investigation and response. Ensure timely collection, validation, analysis, interpretation, and reporting of surveillance data to relevant public health authorities through established reporting mechanisms

Participate in outbreak investigation and response, Rapid Response Team (RRT) activities, field-level assessments, case investigation, contact tracing, risk assessment, and implementation and monitoring of public health interventions. Support public health emergency preparedness activities, including hazard and risk identification, Vulnerability and Risk Mapping (VRM), Emergency Preparedness and Response Plan (EPRP) activities, preparedness monitoring, and coordination of preparedness actions. Analyze epidemiological and surveillance data using DHIS2, SPSS, and Microsoft Excel to identify disease trends, priority areas, and emerging public health threats and to support evidence-based decision-making. Prepare routine surveillance reports, epidemiological summaries, situation updates, data tables, charts, and other technical reports for health-center management and public health authorities.

Provide training, mentorship, and technical support to health-center staff, health extension workers, and community volunteers on disease surveillance, standard case definitions, reporting procedures, data management, PHEM, preparedness, and emergency response. Collaborate with multidisciplinary health teams, Sub-City PHEM teams, and public health authorities to strengthen surveillance systems, improve data quality, coordinate emergency response activities, and facilitate timely implementation of appropriate public health interventions. Support response monitoring, documentation of response activities, identification of operational gaps, and post-response and recovery activities aimed at strengthening preparedness and health-system resilience.

Public Health Officer

Mojo Catholic Clinic, Oromia, Ethiopia

January 2019–May 2024

Provided comprehensive outpatient and public health services, including patient assessment, management of common health conditions, appropriate referral of patients requiring specialized or higher-level care, and continuity of patient care. Participated in routine identification, documentation, and reporting of priority and reportable diseases in accordance with established health reporting procedures.

Provided maternal and child health services, including antenatal care (ANC), counseling, health education, follow-up of pregnant women and mothers, and promotion of appropriate maternal and child health practices. Delivered health education and counseling on disease prevention, reproductive health, nutrition, child health, and appropriate health-seeking behavior.

Supported routine health information management through accurate data collection, documentation, reporting, and follow-up. Participated in community health education and disease-prevention activities and worked collaboratively with healthcare professionals to improve access to and quality of essential health services within the clinic's catchment population

PUBLIC HEALTH & EMERGENCY RESPONSE COMPETENCIES

Epidemiology & Disease Surveillance: Disease surveillance, epidemic-prone disease surveillance, active case search, case investigation, outbreak investigation and response, PHEM, surveillance monitoring, epidemiological data interpretation, and identification of public health threats.

Data Management & Analysis: Epidemiological data collection, data entry, data cleaning, validation, quality assurance, descriptive analysis, interpretation of surveillance trends, and preparation of data for evidence-based public health decision-making.

Data Analysis & Information Systems: Proficient in SPSS, Microsoft Excel, and DHIS2 for epidemiological analysis, public health emergency management, routine health information management, and surveillance reporting.

Reporting & Visualization: Preparation of surveillance reports, epidemiological summaries, situation updates, data tables, charts, technical briefs, and presentations for health teams and public health authorities.

Public Health Emergency Response: PHEM reporting, outbreak response coordination, rapid response activities, emergency preparedness, field-level data collection, response monitoring, and coordination of public health interventions.

Training & Technical Support: Training, mentorship, and technical support for health workers, health extension workers, and community volunteers on disease surveillance, case definitions, reporting procedures, data management, PHEM, and emergency response.

TRAININGS & CERTIFICATIONS

- ❖ Field Epidemiology Training Program (FETP) – Frontline Course
- ❖ Public Health Emergency Management (PHEM) and Disease Surveillance
- ❖ Basic DHIS2 for Public Health Emergency Management (PHEM) Officers
- ❖ National Comprehensive TBL and TB/HIV Training
- ❖ Climate-Sensitive and Diarrheal Disease Surveillance and Response
- ❖ Social and Behavior Change (SBC/SBCC) Training
- ❖ Vulnerability and Risk Mapping (VRM) / Emergency Preparedness and Response Plan (EPRP)
- ❖ Rapid Response Team (RRT) Training

EDUCATION

- ❖ **Master of General Public Health (MGPH)** Adama Hospital Medical College, Adama, Ethiopia | **2026**
- ❖ **Bachelor of Science (BSc) in Public Health** Rift Valley University, Adama, Ethiopia | **2015**
- ❖ **Clinical Nursing** Rift Valley University, Adama, Ethiopia | **2011**
